

`/home/arnaud/programmation/sfml/sfgui/tooltip.hpp`

```
graph BT; A["/home/arnaud/programmation/sfml/sfgui/main.cpp"] --> C["/home/arnaud/programmation/sfml/sfgui/tooltip.hpp"]; B["/home/arnaud/programmation/sfml/sfgui/tooltip.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a gray rectangular box containing the header file path `/home/arnaud/programmation/sfml/sfgui/tooltip.hpp`. Below this box are two white rectangular boxes. The box on the left contains the source file path `/home/arnaud/programmation/sfml/sfgui/main.cpp`, and the box on the right contains `/home/arnaud/programmation/sfml/sfgui/tooltip.cpp`. Two dark blue arrows originate from the bottom-right corner of the left box and the bottom-left corner of the right box, both pointing towards the bottom edge of the top gray box, indicating that both source files include the header file.
